

We also offer leasing options

Our leasing options allows you to choose your own custom colour/logo and have them sequentially numbered.

Colourful and easy to stack

Colours

Saeplast 605 and 630 containers are available in six different colours: white, grey, beige, red, yellow and blue.

Marking

Engraved: Up to 25 letters in black, white, green, blue, yellow or red.

Imprinted: Monochrome marking in black, white, green, blue, yellow or red.

Maximum size is 400 x 200 mm (WxH).

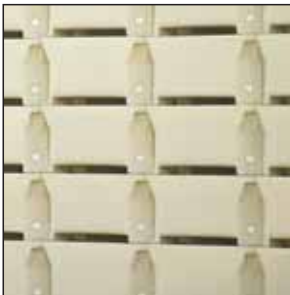

Mould-in graphics: Multi-colour marking available on request.

Stacking

Ergonomic design and streamlined construction ensure that Saeplast containers can be easily stacked, to maximise use of valuable storage space.

Saeplast containers last on average 6-7 years longer than conventional single-walled tubs.

Beware and aware!

Safety, hygiene, efficiency and the optimum handling of delicate products are issues of paramount concern to any meat processor. Achieving this successfully, however, is not always the case.

Uneven surfaces and sharp corners make this single-walled tub an ideal breeding ground for dirt and bacteria. By contrast, Saeplast containers are streamlined for optimum access for easy cleaning and washdown.

Many processors still use containers whose design makes them bulky, difficult to handle and easily damaged. Saeplast containers optimise the use of valuable space and minimise risk of damage. Due to their double walled construction, Saeplast containers are significantly less prone to cracking than conventional single-walled tubs, and are therefore much better suited to the rough conditions associated with meat processing, storage and transportation.

Why take risks with health and safety?
Think clean. Think safe. Think Saeplast.

We offer complete container and handling solutions:

605 Container

Advantages

There are many advantages to using the Saeplast food container. These include:

- Double walled and insulated for ultimate strength and durability
- Complete one piece moulding for safe roto-tipping
- Improved hygiene due to the smooth internal & external surfaces
- Greater lifespan than single walled containers
- All our containers are sequentially numbered ensuring we can track which containers are sent and returned
- Fully compatible with the single walled Dolav containers & lids allowing you to use with your existing fleet.
- Less likely to incur breakage charges due to the exceptional strength.

Double walled and insulated for optimum strength.

Services

GW Container Rentals offers a flexible range of rental and lease packages to suit your requirements, whether it's a long term project or a short term increase in demand. Whatever the situation we are on hand to ensure you receive the highest level of service as well as the highest quality product.

Benefits of renting

- Improve cash flow
- Easy budgeting
- Reduce capital expenditure
- React to peaks in demand

For a quotation call 01543 491870.

Stack capabilities of tubs	
Recommended by Promens:	
Fully loaded	4 units
Empty	8 units

On lease and purchase contracts we can mark containers with your company logo.

The Saeplast 605 is specially designed to inter-stack with Dolav box-pal type 1000 containers.

Type	Description (all dimensions in mm)	Outside dimensions			Inside dimensions			Volume
		L	W	H	L	W	H	Litres
050605	605 MPC Container	1200	1000	760	1140-1100	940-910	590-580	603

Saeplast products are constructed from EU/FDA-approved food-grade materials. Dimensions and weights are +/-2%
